## Bids for Gammapool Resources

Dear colleague,

The deadline for applications to the Gammapool committee for the use of Gammapool resources for the period 1/2020 until 12/2020 is July 1st 2018.

At present, the resources assessed by this agreement comprise all equipment that was financed from the EUROBALL capital as given in the original EUROBALL Memorandum of Understanding, which can be found at

([http://gammapool.inl.infn.it/index/MOU/mou\\_view.htm](http://gammapool.inl.infn.it/index/MOU/mou_view.htm)).

- the HPGe and BGO detectors, including the inner-ball calorimeter, the neutron-wall liquid scintillators and the Euclides Si ball (see caveat below)
- the corresponding electronics and the data acquisition system (see caveat below),
- other infrastructure items jointly owned by the collaboration.

All Bids for Gammapool resources must be accompanied by a physics case, a technical case demonstrating the feasibility of the proposal, and a letter of support from the proposing host institution. Prolongation requests should provide a report. The bids should clearly indicate all resources bid for and detail the period for which the equipment is bid for. Please also bear in mind when preparing the technical case that the EUROBALL electronics is ageing rapidly and cannot be relied on for a campaign. Also due to the need to repair several Phase I detectors, only a limited number of these detectors will be available in the near future.

Bids and letters of intent should be sent to J. Jolie by July 1st. It is usually a good idea to liaise with the Gammapool committee before submitting a bid.

Yours sincerely

A handwritten signature in black ink, appearing to be 'J. Jolie'.

Prof Dr. Jan Jolie, Chairman of the steering committee
